

SALONI THAKUR

Senior Software Automation Test Engineer with 3+ years of experience designing, developing, and maintaining scalable test automation frameworks using Selenium, Appium, Java, and Python. Skilled at integrating automated tests into CI/CD pipelines with Azure DevOps and leveraging cloud-based testing platforms like LambdaTest and BrowserStack. In addition to deep technical expertise in API automation and Agile collaboration, I have demonstrated leadership potential, resulting in my selection for the Women Leadership Program.

Work Experience

Senior Software Automation Test Engineer | Bajaj Finance Ltd July 2022 – Present

CI/CD Pipeline Creation

- Integrated **Azure pipelines** with LambdaTest and BrowserStack to automate cross-platform testing with runtime video capture.
- Executed 1,500+ test cases for webpages in Azure Test Plans, validating functionality and performance to ensure high-quality user experiences
- Ensured automated schedulers for each pipeline, enabling timely and consistent pipeline triggers, thus optimizing the **CI/CD workflow**

Insprint Automation and Scripting

- Developed BDD/Cucumber and POM test scripts in **Java with Selenium and Appium** for comprehensive web and mobile app testing.
- Automated Insprint sanity and regression suites for web and mobile (Android, iOS) modules as part of sprint releases.
- Automated content and API verification for webpages using Python scripts, implementing end-to-end Azure pipelines.
- Automated **SEO data checks** on **80K** URLs with Python, optimized execution under 2 hrs, and enabled end-to-end reporting.

Feature Validation and Knowledge Sharing

- Created comprehensive User Acceptance Testing (**UAT**) scenarios to ensure alignment with business requirements and validate functionality
- Conducted comprehensive **UAT testing**, both manual and automated, on staging and UAT environments for web pages to ensure quality
- Developed Python scripts for image recognition on web pages using AWS services and heatmap generation based on data analysis
- Conducted internal KT sessions on the BDD Cucumber framework for the team, including practical demonstrations and best practices

Continuous Improvement and Innovation

- Researched about TestRigor and BrowserStack Test Observability for improving QA processes for web pages, improving product quality
- Researched and developed a QA tool using **Generative AI tools** like Chat-GPT, Vertex AI, and Claude to generate automated test cases
- Automated and enhanced reports using Python, Azure pipelines, and AWS, incorporating dynamic data, charts, and graphs for web testing

Technical Skills

Frameworks: Selenium, Appium, BDD (Cucumber, Gherkin), Page Object Model **Languages:** Python, Java **CI/CD Pipelines:** Azure Pipelines, CI/CD Integration **Tools & Technologies:** BrowserStack, LambdaTest, TestRigor, AWS (S3,EC2,Lambda), SMTP, Azure DevOps, Maven, Generative AI (Vertex AI, Claude, Chat-GPT, Gemini), LambdaTest Hyperexecute, GitHub Desktop, Git CLI **Libraries:** BeautifulSoup,HTML.parser,Urllib,Lxml,Requests,Pandas,NLTK

Education

College of Engineering Pune Aug 2019 – May 2022

Bachelor in Technology in Mechanical Engineering

Minor in Computer Engineering

Government Polytechnic, Amravati Aug 2016 – May 2019

Diploma in Mechanical Engineering

Certifications

- | | |
|--|----------|
| • Using Python to Access Web Data  University of Michigan | Oct 2023 |
| • Introduction to Generative AI Studio  Google Cloud | Sep 2023 |
| • Introduction to Generative AI  Google Cloud | Aug 2023 |
| • Python Data Structures  University of Michigan | Dec 2022 |

Awards and Achievements

- Heroes Award:** Developed a BDD framework in Java and Python scripts to verify the content of 10,000+ webpages against API data
- Prodigy Award:** Innovation using GEN AI in the field of Automation testing
- Kudos Award:** Led end-to-end automation testing and developed python scripts to check SEO data on 10,000+ pages, enabling early delivery
- Hackathon Mentor:** Selected to mentor SRM University students on language transliteration and contextual web content relevance

Position of Responsibilities

- ID3D Event Head at Mindspark'20:** Led the execution of the ID3D event at COEP's **national level annual technical festival**
- Training and Placement Coordin.:** Coordinated training sessions and placement drives in COEP, liaising between students and recruiters
- Community Reach and Networking Head,ZEST'21:** Spearheaded community outreach and networking efforts, engaging over 150+ colleges and bringing in 10,000+ participants for the online event during the pandemic
