EXPERIENCE

Software Engineer

[Manhattan Associates](#)

📅 Mar 2023 – Present

📍 Bengaluru, India

- Designed and optimized **Spring Boot applications**, improving scalability and maintainability.
- Built and deployed **3+ custom modules** integrating with third-party systems, enhancing business workflows.
- Resolved performance bottlenecks using **optimistic locking, batch processing, and query optimization**, improving system throughput by **30%** and reducing average response time from **300ms → 150ms**.
- Enhanced API/job performance for secure data exchange with external services, reducing errors by **15%** and improving **system reliability**.
- Collaborated with cross-functional teams to gather requirements and design solutions aligned with business objectives.
- Implemented unit tests, code reviews, and **CI/CD practices**, improving **code quality and deployment efficiency**.

System Engineer

[Infosys](#)

📅 June 2021 – Mar 2023

📍 Pune, India

- Improved code quality and performance through reviews and optimizations, reducing bugs by 11
- Used Jira for defect tracking, decreasing weekly incidents from 100 to 60.
- Automated production support tasks, saving 20+ hours weekly and avoiding a \$26,000 penalty.
- Resolved bugs to reduce customer complaints by 10

TECHNICAL SKILLS

- **Programming Languages:** Core JAVA, C++, Python (Familiar), Shell Script
- **Database:** Oracle DB, MySQL
- **Technologies:** OOPS, Spring, Spring Boot
- **Platform & Tools:** Windows, UNIX, Git, Kibana, Grafana, Jira, Jenkins
- **Frontend:** HTML, CSS, JavaScript, ReactJS
- **Other:** DSA, Low Level Design, High Level Design
- **Familiar:** RabbitMQ, GCP Cloud, Kafka, REST API, Docker

EDUCATION

B.Tech. (IT) - 7.3 CGPA

Institute of Engineering & Technology

📅 2016 – 2020

📍 Lucknow

Higher Secondary - 86.6%

DAV Public School

📅 2015-2016

📍 Muzaffarnagar

ACHIEVEMENTS

- Solved **600+** problems on LeetCode and Gfg: [LeetCode Profile](#) · [Gfg Profile](#)
- Won “**Rookie Rockstar**” award in first year at Manhattan Associates for outstanding performance — [View Certificate](#)
- Received multiple **Star of the Quarter Awards** for consistent contributions to development and project delivery — [View Certificate](#)
- **Hackerrank Problem Solving Certification:** [View Certificate](#)
- **LinkedIn Spring Boot Certification:** [View Certificate](#)

PROJECTS

- **Split Group Expense Tracker (Backend)** 🌐
Tech Stack: Java, Spring Boot, H2, JPA, Lombok — Enabled groups to effortlessly manage and settle expenses, saving time and reducing manual errors.
 - **Minimal Transaction Settlement:** Optimized algorithm to reduce number of payments and computation time.
 - **Automated Balance Calculation:** Computes per-user balances efficiently for any group size.
 - **CRUD Validation:** Robust APIs for users, groups, and expenses with input validation.
- **Distributed Fault-Tolerant Task Queue** 🌐
Tech Stack: Java, Spring Boot, RabbitMQ, Spring AMQP, JPA — Ensured reliable distributed task execution, improving system efficiency and up-time.
 - Implemented **distributed task processing** with multiple concurrent consumers, enabling horizontal scaling.
 - Designed **fault-tolerance** with automatic retries, max attempt tracking, and dead-letter queue for failed tasks.
 - Maintained **persistent task status tracking** (PENDING, PROCESSING, COMPLETED, FAILED) in database for reliability and auditing.
- **ChefKart (React.js Frontend Web Application)** 🌐
Tech Stack: React.js, Bootstrap 5, Framer Motion — Delivered a seamless e-commerce experience with interactive UI and enhanced customer engagement.
 - Developed a responsive and interactive UI using **React.js, Bootstrap 5, and Framer Motion**.
 - Implemented a dynamic **cart sidebar** with add/remove functionality and real-time cart count updates.
 - Integrated a **Dark/Light mode toggle** that changes theme across the entire application.
